

**IN THE CLAIMS:**

The status of the claims is as follows:

1 –75. Canceled.

76. (Previously Presented) A method for providing location based services in a wireless network comprising the steps of:

receiving, on a network platform in communication with a subscriber using a mobile unit via an air interface, a service request requesting service provider information regarding said location based services, said service request including service type information identifying a type of service for which said service provider information is requested;

obtaining, on said network platform, location information regarding a location of said mobile unit determined using a network assisted location finding technology, said technology being operative to provide location information regarding said mobile unit based at least in part on a position of the mobile unit in relation to a known location of a stationary ground based network structure;

identifying, on said network platform, first and second service providers and associated first and second service provider information based upon said service type information and said determined location of said mobile unit wherein said first service provider is farther from said mobile unit than said second service provider;

accessing stored subscriber independent prioritization information, separate from said service type information, relating to a prioritization for presenting service provider information to a subscriber, said stored prioritization information establishing a basis independent of proximity and independent of any subscriber preferences for prioritizing said first and second service provider information;

based upon said stored prioritization information, prioritizing said first and second service provider information, wherein said first location information is assigned a higher priority than said second location information; and

outputting both said first and second service information on said mobile unit based upon said step of prioritizing.

77. (Previously Presented) A method as set forth in Claim 76, wherein said step of obtaining comprises receiving said location information at least in part from location equipment separate from said mobile unit.

78. (Previously Presented) A method as set forth in Claim 76, wherein said step of identifying comprises accessing service provider information storage based on said service type information and said location information.

79. (Previously Presented) A method as set forth in Claim 76, wherein said step of accessing comprises obtaining information established by a network administrator regarding said prioritization for presenting said service provider information to said subscriber.

80. (Previously Presented) A method as set forth in Claim 76, wherein said step of prioritizing comprises ordering said first and second service provider information for presentation to said subscriber.

81. (Previously Presented) A method as set forth in Claim 76, further comprising accessing service provider information storage based on said service type information and said location information to identify a third service provider and associated third service provider information, and using second prioritization information, the same or different than said subscriber independent prioritization information, to determine a content of a listing of service provider information output to said mobile unit, wherein said third service provider information is excluded from said listing based on said second prioritization information.

82. – 87. Canceled
